Moc w drodze zawsze z Tobą

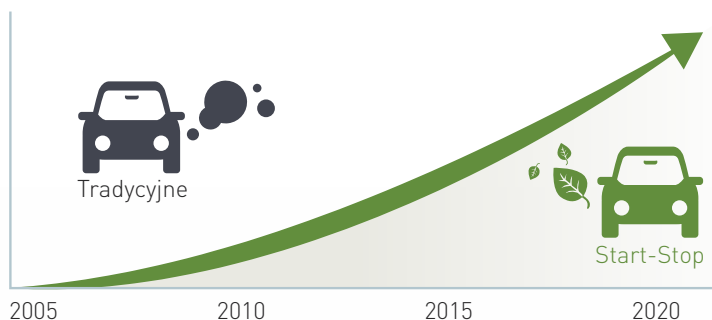

Innowacyjne rozwiązania wspierają niezależny rynek wtórny

Exide ma przyjemność zaprezentować nową gamę akumulatorów do samochodów osobowych, stworzoną z myślą o rynku wtórnym (AM). Wiele zastosowanych rozwiązań ma swoje korzenie w naszych produktach dostarczanych na pierwsze wyposażenie (OE) największym producentom aut. Obecne produkty zostały zaprojektowane, aby wspierać najnowsze rozwiązania technologiczne, takie jak: systemy Start-Stop i systemy rekuperacji. W efekcie nowe akumulatory odznaczają się ponadprzeciętną wydajnością i są odporne na nadchodzące zmiany na rynku pojazdów osobowych.

Przygotowani na przyszłość

Europejski rynek samochodowy zmienia się z niespotykaną dotąd szybkością. Prawo UE zobowiązuje producentów samochodów do zredukowania emisji CO₂ do poziomu 130g/km do 2015 roku, a następnie do poziomu 95g/km do 2021 roku. Oznacza to aż 40-procentową redukcję emisji CO₂, za którą odpowiedzialne są samochody produkowane od 2007 roku! Te ambitne cele zmusiły producentów samochodów do projektowania bardziej ekologicznych aut, wyposażonych w nowoczesne silniki, zaawansowane systemy, np. Start-Stop, system zarządzania akumulatorem czy inteligentny alternator. Nowe technologie bazują na zaawansowanych akumulatorach AGM i EFB, a wzrost produkcji aut mikrohybrydowych w Europie jest zauważalny już dziś. Choć tradycyjne samochody nadal stanowią większość na drogach, to liczba samochodów z systemem Start-Stop bardzo szybko wzrasta.

Ewolucja europejskiego rynku samochodów

- › 70% produkowanych dziś aut jest wyposażonych w rozwiązania redukujące spalanie paliwa i emisję CO₂ na poziomie od 5% do 12%
- › 15% europejskich samochodów jest wyposażonych w system Start-Stop. Oczekuje się, że liczba ta zwiększy się dwukrotnie w ciągu najbliższych 5 lat
- › Pojazdy z systemem Start-Stop potrzebują akumulatorów AGM i EFB – spełniających wymagania dotyczące pierwszego wyposażenia (OE)
- › Zapotrzebowanie na zaawansowane akumulatory o tradycyjnej konstrukcji, jak i na akumulatory oparte na nowej technologii, będzie wzrastać wraz z ewolucją rynku

Zaufanie wiodących producentów samochodów

Dostarczamy akumulatory kwasowo-ołowiowe producentom samochodów od ponad 100 lat. Tworzymy technicznie najbardziej zaawansowane produkty (jako pierwsi wprowadziliśmy na europejski rynek akumulatory do pojazdów z systemem Start-Stop w 2004 roku). Producenci samochodów ufają jakości naszych produktów.

Współpracujemy z największymi producentami samochodów, m.in.:

Alfa Romeo, BMW, Citroën, Dacia, Fiat, Jaguar Land Rover, Lancia, Mini, Nissan, Peugeot, Renault, Saab, Suzuki, Toyota, Volkswagen Group, Volvo

Start-Stop AGM

Wybieraj tylko oryginał

Nasza firma opracowała pierwszy akumulator AGM do aut z systemem Start-Stop w 2004 roku. Od tego czasu stosowana przez nas technologia szybko się rozwijała, a każda nowa gama produktów wiązała się ze wzrostem ich wydajności. Duże nakłady inwestycyjne w zaawansowane zakłady produkcyjne sprawiły, że jesteśmy jednym z największych na świecie producentów akumulatorów AGM. Spełniając rygorystyczne wymagania producentów samochodów, oferujemy jednocześnie

wysokiej jakości produkty na rynku wtórnym (AM).

Akumulatory Centra Start-Stop AGM wykorzystują nowoczesne komponenty i materiały, w tym separatory z maty szklanej, zaawansowane stopy ołowiu i cyny oraz unikalne dodatki węgla do masy aktywnej. Są one dostosowane do samochodów z systemem Start-Stop i/lub z systemem hamowania rekupeacyjnego. Nowa generacja akumulatorów AGM sprawdzi się również na łodziach i w innych zastosowaniach, bazujących na inteligentnych układach oszczędzania paliwa.

NOWOŚĆ

Technologia AGM

Zalety:

- › Najlepsza zdolność przyjmowania ładunku
- › 4-krotnie dłuższa żywotność w pracy cyklicznej
- › Optymalizacja pod kątem niepełnych doładowań
- › Idealna do dużych samochodów, SUV-ów, vanów, pojazdów z systemem Start-Stop oraz pojazdów wyposażonych w wiele odbiorników prądu
- › Najwyższej klasy zabezpieczenia (szczelnie zamknięty – elektrolit uwięziony w macie szklanej)
- › System rekombinacji VRLA (regulowany za pomocą zaworów)
- › Najnowsza generacja produktów została zaakceptowana przez producentów samochodów
- › Bardzo dobre pokrycie parku samochodowego przy niewielkiej liczbie produktów w gamie
- › Długi czas przechowywania na półce sklepowej

(szczegóły na s. 7)

Start-Stop EFB

Krok naprzód

Motywacją do stworzenia pierwszego akumulatora EFB* w 2008 roku była wynikiem chęci wsparcia europejskich producentów samochodów w zakresie redukcji zużycia paliwa i zmniejszenia emisji CO₂ w małych oraz średnich autach. Inwestycje w badania i rozwój oraz wieloletnia współpraca z największymi producentami samochodów zaowocowały postrzeganiem naszej technologii jako najbardziej zaawansowanej.

Dzięki zastosowaniu stopów ołowiu i dodatków węglowych akumulatory EFB z najnowszej gamy odznaczają się lepszą zdolnością przyjmowania ładunku i dobrą żywotnością w pracy cyklicznej. Akumulatory EFB doskonale współpracują z systemami Start-Stop, systemami hamowania regeneracyjnego i innymi, zaawansowanymi technologiami redukującymi zużycie paliwa.

NOWOŚĆ

Technologia EFB

Zalety:

- › Wysoka zdolność przyjmowania ładunku przez cały okres pracy
- › 3-krotnie dłuższa żywotność w pracy cyklicznej
- › Optymalizacja pod kątem niepełnych doładowań
- › Idealna do małych i średnich aut z systemem Start-Stop oraz z innymi systemami redukcji spalania
- › Nowoczesne rozwiązania w zakresie bezpieczeństwa eksploatacji
- › Najnowsza generacja produktów została zaakceptowana przez producentów samochodów
- › Bardzo dobre pokrycie parku samochodowego przy niewielkiej liczbie produktów w gamie
- › Długi czas przechowywania na półce sklepowej

* EFB – nazwa technologii (Enhanced Flooded Battery) zdefiniowana przez CENELEC w 2012 r.

Centra Futura

CARBON BOOST

Nowe akumulatory Centra Futura Carbon Boost ładują się do 1,5 raza szybciej dzięki zastosowaniu opatentowanych dodatków węglowych. Technologię tę odkryto podczas prac rozwojowych nad gamami AGM i EFB, co doprowadziło do polepszenia zdolności przyjmowania ładunku i znaczącego skrócenia czasu ładowania. Akumulator Centra Futura Carbon Boost został zaprojektowany, aby sprostać ekstremalnym temperaturom i wymaganiom pojazdów z bogatym wyposażeniem, intensywnie użytkowanym.

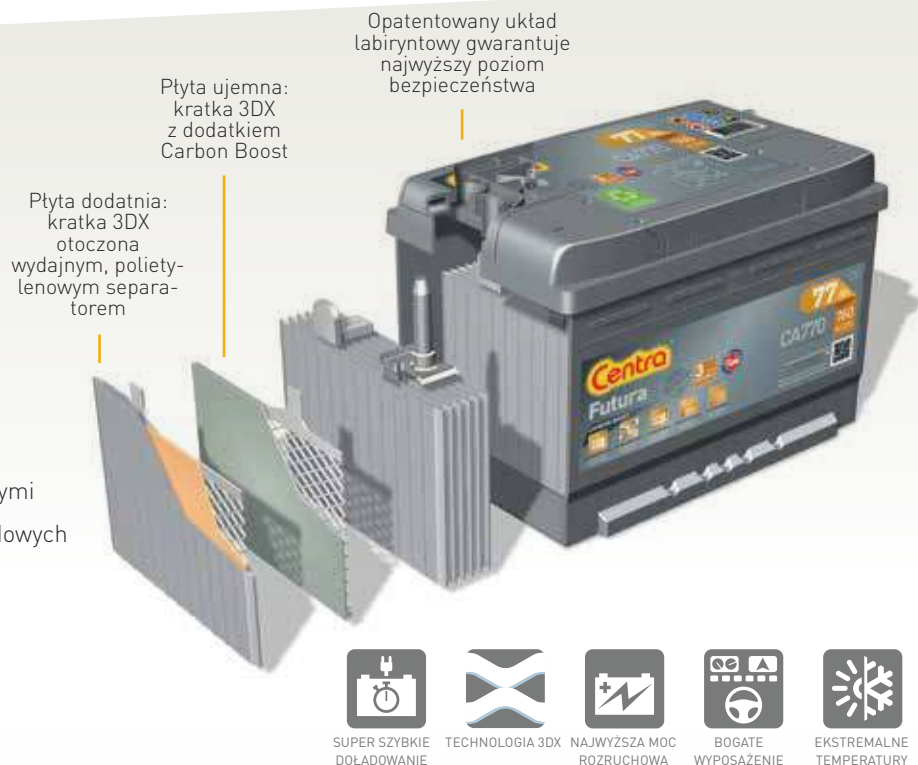

NOWOŚĆ

Technologia Centra Carbon Boost

Zalety:

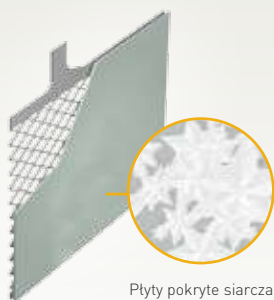

- › 30% więcej mocy rozruchowej
- › Do 1,5 raza szybsze doładowanie
- › Idealna do bogato wyposażonych aut z mocnymi silnikami i wymagającymi instalacjami elektrycznymi
- › Zastosowanie w ekstremalnych warunkach pogodowych oraz w ruchu miejskim
- › Spełnia wymagania stawiane produktom na tzw. pierwsze wyposażenie (OE)
- › Pokrywa ok. 90% parku samochodowego

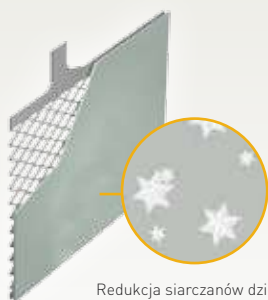

Efekty działania formuły Carbon Boost

Bez Carbon Boost

Z Carbon Boost

Płyty pokryte siarczanami

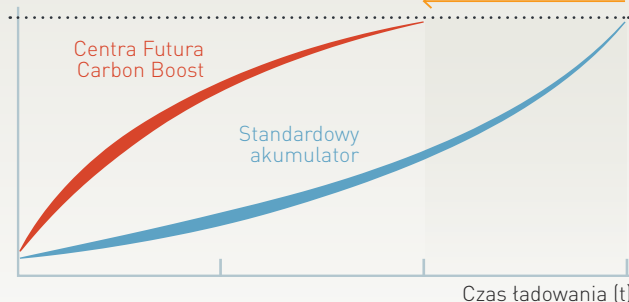

Redukcja siarczanów dzięki technologii Carbon Boost

W wyniku rozładowywania akumulatora nieprzewodzące cząsteczki siarczanów stopniowo pokrywają płyty ujemne, izolując je od elektrolitu. W takiej sytuacji duża ilość energii jest wykorzystywana na rozpuszczenie siarczanów, co obniża efektywność ładowania. Wysoko powierzchniowy węgiel w akumulatorach Centra Futura Carbon Boost zapewnia doskonałe przewodnictwo, dzięki czemu siarczany rozpuszczają się znacznie szybciej.

Poziom naładowania

1,5 raza szybsze ładowanie

Testy laboratoryjne wykazały, że ładowanie akumulatora Centra Futura Carbon Boost trwa zdecydowanie krócej niż ładowanie standardowego akumulatora w takich samych warunkach.

SUPER SZYBKIE DOŁADOWANIE

Centra Futura Carbon Boost ma lepszą zdolność przyjmowania ładunku (ładuje się do **1,5 raza szybciej** niż standardowe akumulatory).

Często akumulator jest pierwszą przyczyną awarii samochodu*. Dzięki szybkiemu ładowaniu akumulator jest naładowany w większym stopniu, co w określonych warunkach użytkowania (niskie temperatury, ruch miejski) przekłada się na **wydłużenie żywotności akumulatora**.

Centra Plus

Zalety:

- › 15% więcej mocy rozruchowej
- › Wszechstronny akumulator do standardowego użytkowania
- › Gama akumulatorów dopasowanych do niemal wszystkich samochodów
- › Doświadczenie producenta akumulatorów dostarczanych na pierwsze wyposażenie (OE)

TECHNOLOGIA 3DX

WYŻSZA MOC
ROZRUCHOWASTANDARDOWE
WYPOSAŻENIE

Centra Standard

Zalety:

- › Ekonomiczne rozwiązanie
- › Do aut z podstawowym wyposażeniem

TECHNOLOGIA 3DX

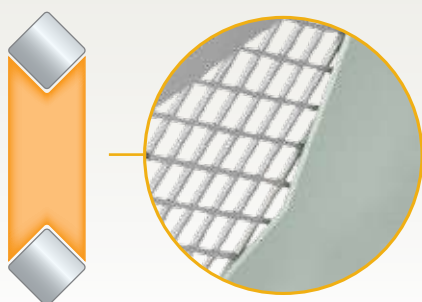

Kratka 3DX – tajemnica każdego akumulatora Centra

Inna kratka

Kratka 3DX

Wzmocniona siatka w kształcie rombu sprawia, że masa aktywna jest trwale związana z siatką, przez co uzyskuje się lepsze parametry elektryczne i dłuższą żywotność akumulatora

Zalety:

- › Ponadprzeciętna przyczepność masy aktywnej wydłuża żywotność akumulatora
- › Większa ilość energii dzięki lepszemu przewodnictwu
- › Dobrej jakości stopy maksymalizują żywotność i wydajność
- › Odporność na wibracje i korozję
- › Produkcja przyjazna środowisku naturalnemu
- › Niezmiennie wysoka jakość dzięki zautomatyzowanemu procesowi produkcji

Czy wiesz, że? – Czynniki, które najbardziej eksploatują Twój akumulator

Niskie temperatury bardzo niekorzystnie wpływają na wydajność akumulatora. Co więcej, w zimie zwiększa się zapotrzebowanie energetyczne na oświetlenie i ogrzewanie.

Wysokie temperatury przyspieszają samorozładowanie, korozję kratki i degradację masy czynnej. Nieprzystosowanie akumulatora do niekorzystnych warunków atmosferycznych może skrócić jego żywotność.

W ruchu miejskim silnik jest często wytężany lub pracuje na biegu jałowym, a odbiorniki prądu mogą zużywać więcej energii, niż alternator jest w stanie wytworzyć. To dodatkowo obciąża akumulator.

Zaawansowane wyposażenie, jak odtwarzacze multimedialnych lub nawigacja, również dodatkowo obciąża akumulator.

Jaki akumulator wybrać?

 Tradycyjne

 Start-Stop

Stary akumulator zawsze wymień na akumulator wykonany w takiej samej technologii.

AGM

EFB

Nigdy nie używaj tradycyjnych akumulatorów w autach z systemem Start-Stop.

Układ napędowy samochodów Start-Stop działa zupełnie inaczej niż jego odpowiednik w standardowych pojazdach. Tylko akumulatory AGM i EFB mogą pracować w warunkach wyťažonej pracy cyklicznej.

Czy wiesz, że? – Możesz używać akumulatorów Start-Stop także w tradycyjnych samochodach!

Auta intensywnie używane, np. taksówki, karetki pogotowia i policyjne radiowozy, wymagają akumulatorów o podwyższonej odporności na pracę cykliczną. Dlatego akumulatory Start-Stop są w podobnych zastosowaniach idealnym wyborem. Dotyczy to również samochodów z bogatym wyposażeniem elektrycznym i pojazdów używanych głównie w ruchu miejskim.

Uniknij przedwczesnego uszkodzenia akumulatora i ogranicz koszt jego użytkowania, wybierając akumulator AGM lub EFB o cztero-, trzykrotnie większej wytrzymałości na pracę cykliczną (w porównaniu ze standardowymi akumulatorami).

Więcej niż akumulatory

Oferujemy wszechstronną gamę akcesoriów i wsparcie. Pomożemy Ci testować, dobierać, wymieniać i utylizować akumulatory – wszystko po to, by Twój warsztat się rozwijał i oferował najlepszą jakość świadczonych usług, zwiększając Twoje zyski.

Testowanie

Tester akumulatorów

Oferujemy gamę łatwych w użyciu testerów, które współpracują ze wszystkimi typami akumulatorów.

Akumulator sprawny?

Ładowanie

Prostownik

Prostowniki Exide mogą być używane w samochodach, łodziach i motocyklach, są idealne zarówno do użytku domowego, jak i profesjonalnego. Warsztaty używające tego narzędzia, mają pewność, że klient opuszcza warsztat z optymalnie naładowanym akumulatorem.

Start-Stop AGM

Zastosowanie

START-STOP

Układy napędowe z systemem Start-Stop

Gdy poprzedni akumulator był wykonany także w technologii AGM

HAMOWANIE REGENERACYJNE

Systemy odzyskiwania energii, jak np. inteligentny alternator lub hamowanie rekuperacyjne

NAJWYŻSZA MOC ROZRUCHOWA

Duże silniki wymagające większej mocy rozruchowej

INTENSYWNE UŻYTKOWANIE

Intensywna jazda miejska

CONVENTIONAL

Wersja dla taksówek lub lekkich pojazdów użytkowych. Więcej w instrukcji użytkownika na www.centra.info

Zalety

Sprzęt na tzw. pierwsze wyposażenie

Bardzo dobre pokrycie parku samochodów z systemem Start-Stop

4-krotnie dłuższa żywotność w pracy cyklicznej (w porównaniu z tradycyjnymi akumulatorami)

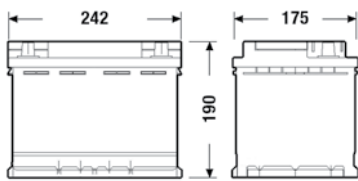

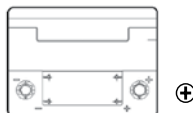

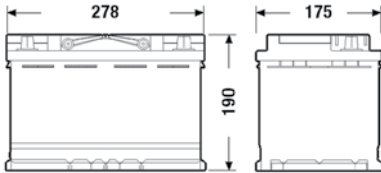

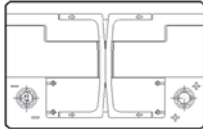

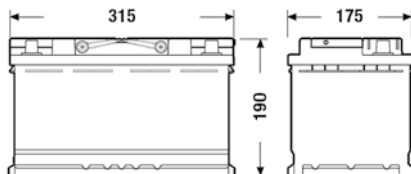

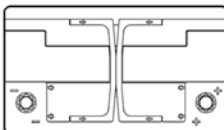

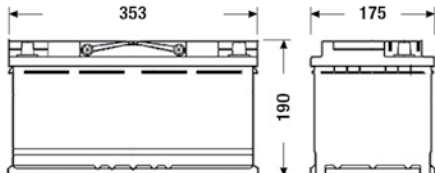

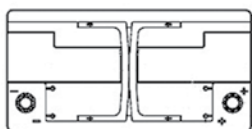

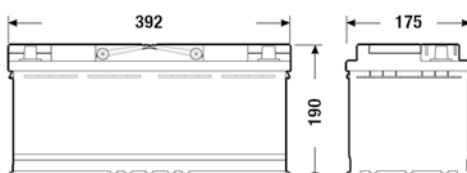

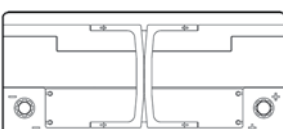

Zabezpieczone przed skutkami wycieków i przechytów, wieczko z regulacją zaworową (VRLA)

W pełni bezobsługowy

Wyprodukowano w Europie

Wersja dla taksówek lub lekkich pojazdów użytkowych. Więcej w instrukcji użytkownika na www.centra.info

Zalety

Sprzęt na tzw. pierwsze wyposażenie

95% PARC COVERAGE

Bardzo dobre pokrycie parku samochodów z systemem Start-Stop

3x WIEKSZA CYKLICZNOŚĆ

3-krotnie dłuższa żywotność w pracy cyklicznej (w porównaniu z tradycyjnymi akumulatorami)

SAFETY

Zabezpieczone przed wyciekami, zgrzewane wieczko z zabezpieczeniem przeciwwiskrowym

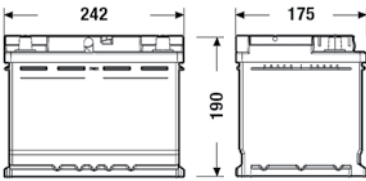

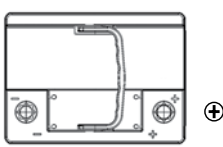

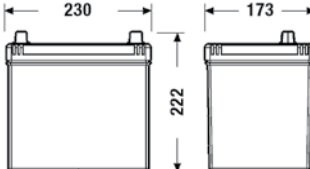

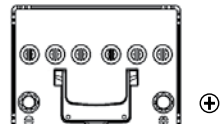

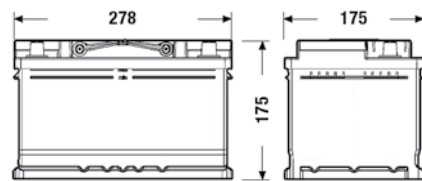

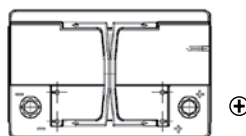

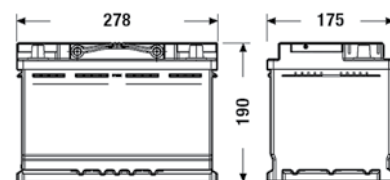

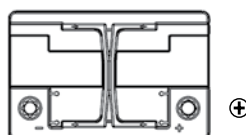

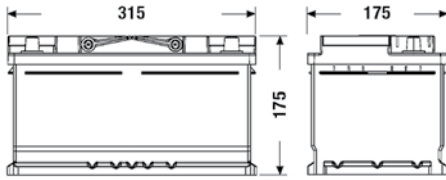

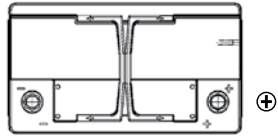

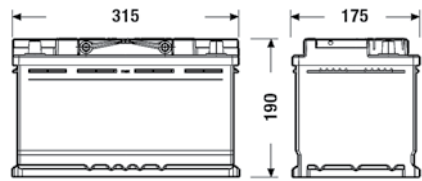

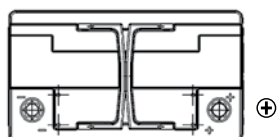

MAINTENANCE FREE

W pełni bezobsługowy

Wyprodukowano w Europie

Start-Stop Auxiliary

Zastosowanie

START-STOP

Układy napędowe z systemem Start-Stop

Gdy poprzedni akumulator był wykonany także w technologii AGM

Dodatkowe źródło zasilania elektrycznego wyposażenia auta

CONVENTIONAL

Do instalacji również w konwencjonalnych układach napędowych, wymagających akumulatora wspomagającego

Zalety

Oryginalna część zamienna, zgodna z europejskimi normami

Wysokie pokrycie parku samochodów z systemem Start-Stop

3-krotnie dłuższa żywotność w pracy cyklicznej (w porównaniu z tradycyjnymi akumulatorami)

SAFETY

Zabezpieczone przed skutkami wycieków i przechytów, wieczko z regulacją zaworową (VRLA)

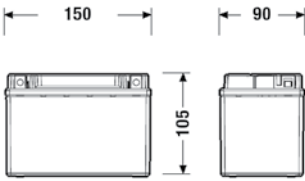

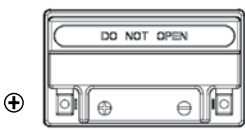

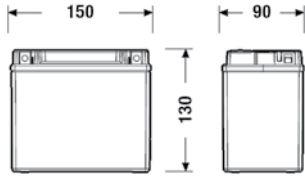

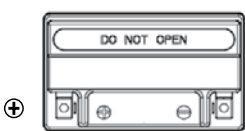

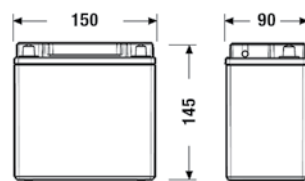

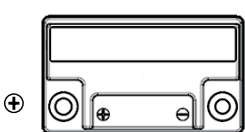

MAINTENANCE FREE

W pełni bezobsługowy

Spełnia wymogi UE

Paliwo

-	Benzyna
D	Diesel
EV	Napęd elektryczny

Umiejscowienie akumulatora

-	Przedział silnika
B	Bagażnik
C	Pod przednimi siedzeniami
H	W podnóżku

Montaż akumulatora

X2	Wymagane 2 akumulatory
----	------------------------

Mocowanie

Adapter Ford	Może być wymagany adapter stożka akumulatora do fordowskich końcówek biegunów
Adapter JIS	Może być wymagany adapter końcówek JIS do standardowych końcówek biegunów
Adapter VW	Może być wymagany adapter standardowego mocowania do mocowania VW
